

StreamSense

Viewer Engagement & Retention Insights

User Manual

1. Introduction

StreamSense helps content acquisition teams analyze viewer engagement and retention using interactive dashboards and reports.

2. System Requirements

Browser: Chrome/Edge • RAM: 4 GB+ • Internet connection • Node.js and MongoDB for development.

3. Login

Open the application, enter your email and password, then click Login. After successful authentication, the Executive Dashboard opens.

4. Executive Dashboard

View key metrics such as Active Users, Engagement Score, Retention Rate, Churn Rate and Average Watch Time.

5. Viewer Analytics

Use filters to analyze watch duration, pause frequency, completion percentage and viewing trends.

6. Content Performance

Compare titles by engagement score, completion rate and genre performance to identify successful content.

7. Retention Analytics

Review retention trends, churn rate and cohort analysis to understand subscriber behaviour.

8. Recommendations

View recommendations such as Renew, Monitor or Review Content based on engagement and retention insights.

9. Reports

Generate weekly or monthly reports and export them as PDF for meetings and analysis.

10. Settings

Update profile information, notification preferences, theme settings and securely log out.

Troubleshooting

Issue	Solution
Unable to Login	Check email and password.
Dashboard not loading	Refresh page or verify server connection.
No analytics displayed	Ensure viewer session data is available.
Report generation failed	Verify date range and retry.

Best Practices

Use updated datasets, review engagement and retention together before making decisions, export reports regularly, and always log out after completing your work.
